## GENESIS MISSION PATCH DESIGN CONTEST WINNERS

April 1, 1999

The NASA Discovery series Genesis mission announces that Community Park School student Rebecca Annitto, daughter of Miki Seraf and Bill Annitto, has been named a winner in the age 8 and under category in a recent contest to design a mission patch. Rebecca's entry may be found on the Internet at the Genesis mission Web site at <http://genesismission.jpl.nasa.gov>.

Entries were judged by personnel from Genesis mission partner agencies. Designs were judged on originality, theme and use of the required design elements. According to Dr. Gil Yanow, Genesis mission Outreach Coordinator at Jet Propulsion Laboratory and contest judge, "I was amazed at the ability of not only the adults, but also children, to truly capture the scientific essence and significance of our mission."

Contest entries numbered nearly 300 and came from 23 states, Canada, England, and Malaysia. Entry format ranged from crayon to watercolor, from colored pencil to computer graphics.

Winning designs in four age categories are displayed on the Genesis mission Web site and may be used on future mission-related products. The four top winners will receive a certificate of recognition and a space exploration book. The Mid-continent Regional Educational Laboratory (McREL) in Aurora, Colorado coordinated the mission patch contest.
